```
# The famous Hello World
# Program is trivial in
# Ruby. Superfluous:
#
# * A "main" method
# * Newline
# * Semicolons
#
# Here is the Code:

puts "Hello World!"
```

OpenSSL Severe Vulnerability in TLS Heartbeat Extension (CVE-2014-0160)

There is a severe vulnerability in OpenSSL's implementation of the TLS/DTLS (transport layer security protocols) heartbeat extension (RFC6520). This a serious vulnerability which has been assigned the CVE identifier CVE-2014-0160.

Ruby Issue Tracking System

Home

Ruby is a dynamic, open source programming language with a focus on simplicity and productivity. It has an elegant syntax that is natural to read and easy to write. This system is hosting the development of Ruby language and its related projects.

You must register your account and activate it via an email before reporting issues.
Or login if you have an account.

How to report a bug

See HowToReport (English) or HowtoReportJa (Japanese).

- ruby-trunk - Developing version of Ruby

About Security Reports

Please *DO NOT* report security issues via this system, because the system publishes them immediately.
In order to report, send a mail to security@ruby-lang.org instead. Reported problems will be published after fixes.

Ruby Language Home

github を用いた開発フロー テンプレート

Development (開発の進め方)

GitHub Flow の利用

- masterブランチは常にデプロイ可能な状態としなければならない
  - テストが失敗する状態の場合、直ちに修正するべきである
  - テストが失敗する状態の場合、デプロイすることは許されない

- 「新しい何か」に取り組む際は、 pull request を用いるべきである
  - ブランチは master から作成し、ブランチ名は説明的な名前とするべきである (例: new-oauth2-scopes, fix-broken-db-connection)
  - 作成したブランチにローカルでコミット後、ただちに github に push し、タイトルに [WIP] と

cookpad/kage

README.md

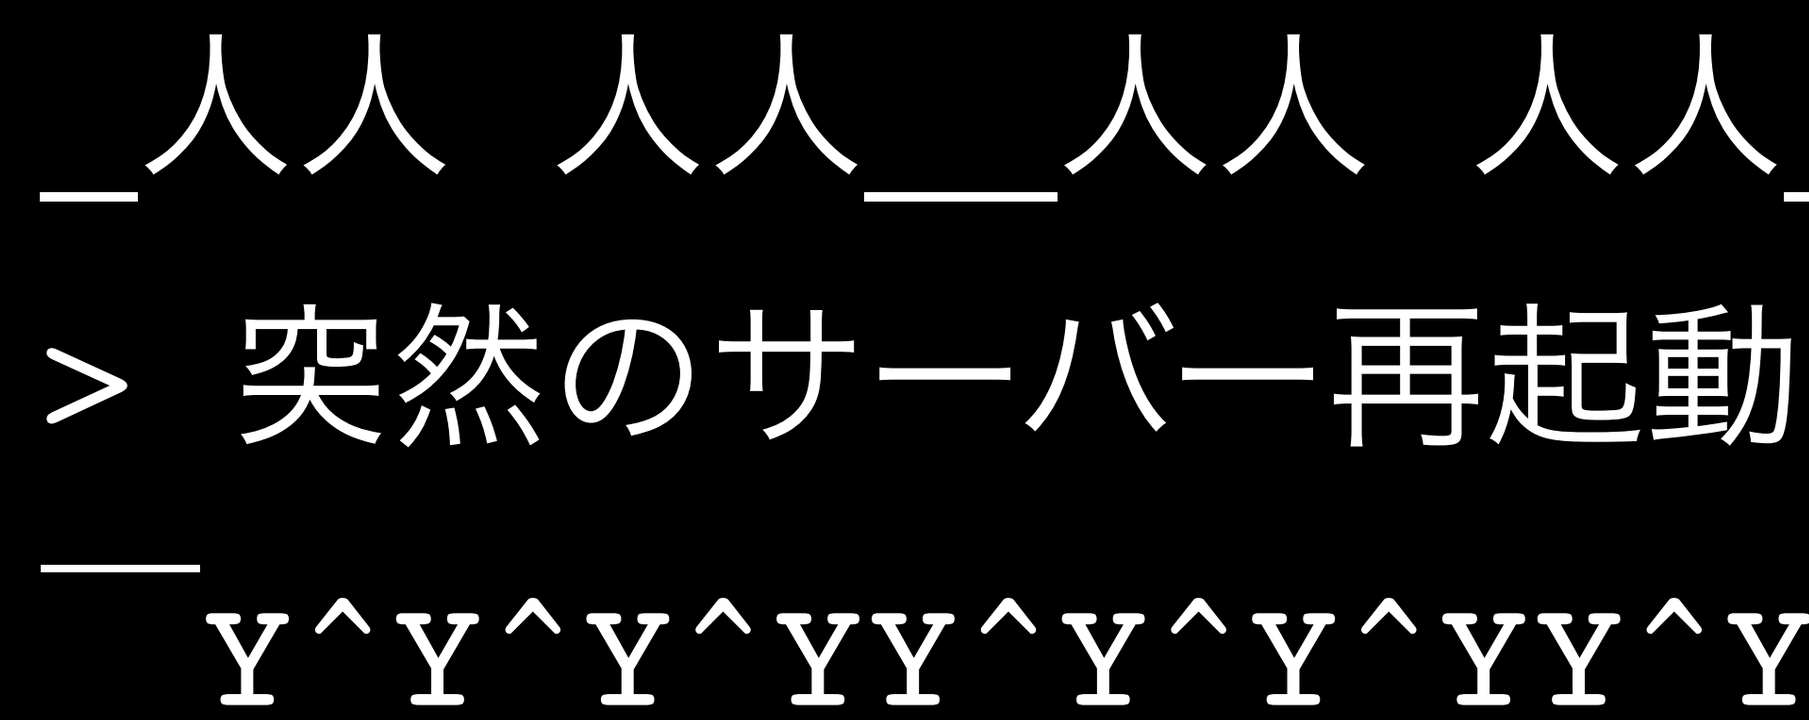

Kage (kah-geh) is an HTTP shadow proxy server that sits between clients and your server(s) to enable "shadow requests".

the basic of kage

v1.2 **v1.3**

What is Bundler?

Bundler maintains a consistent environment for ruby applications. It tracks an application's code and the rubygems it needs to run, so that an application will always have the exact gems (and versions) that it needs to run.

Would you like to

Get started | Report a bug | See what's new | Read documentation

Getting Started

rails 2.3 with bundler

```
source 'https://rubygems.org'

gem 'rails', '~> 2.3.18'
gem 'rake', '~> 0.9.2'
gem 'rdoc'
gem 'rake-confirm'

gem 'mysql'
gem "mysql_retry_lost_connection"
gem 'acts_as_paranoid', :github => 'paperboy-30days/acts_as_paranoid'
gem 'passenger', '~> 3.0'
gem 'memcache-client', :require => 'memcache'
gem 'system_timer'
gem 'yajl-ruby', :require => 'yajl'
gem 'will_paginate', '~> 2.3'
gem 'mail'

gem 'sass'
gem 'compass-rails'

gem 'osaipo_client', :git => 'git@github.com:paperboy-all/
osaipo_client.git', :branch => 'legacy'
gem 'jugem_client', :git => 'git@github.com:paperboy-all/
jugem_client.git'
gem 'ppb_footer', :github => 'paperboy-all/ppb_footer'
```

```
require "./config/environment"
use Rails::Rack::LogTailer
use Rails::Rack::Static
run ActionController::Dispatcher.new
```

rack with rails 2.3

can’t use hyphen

30days-front

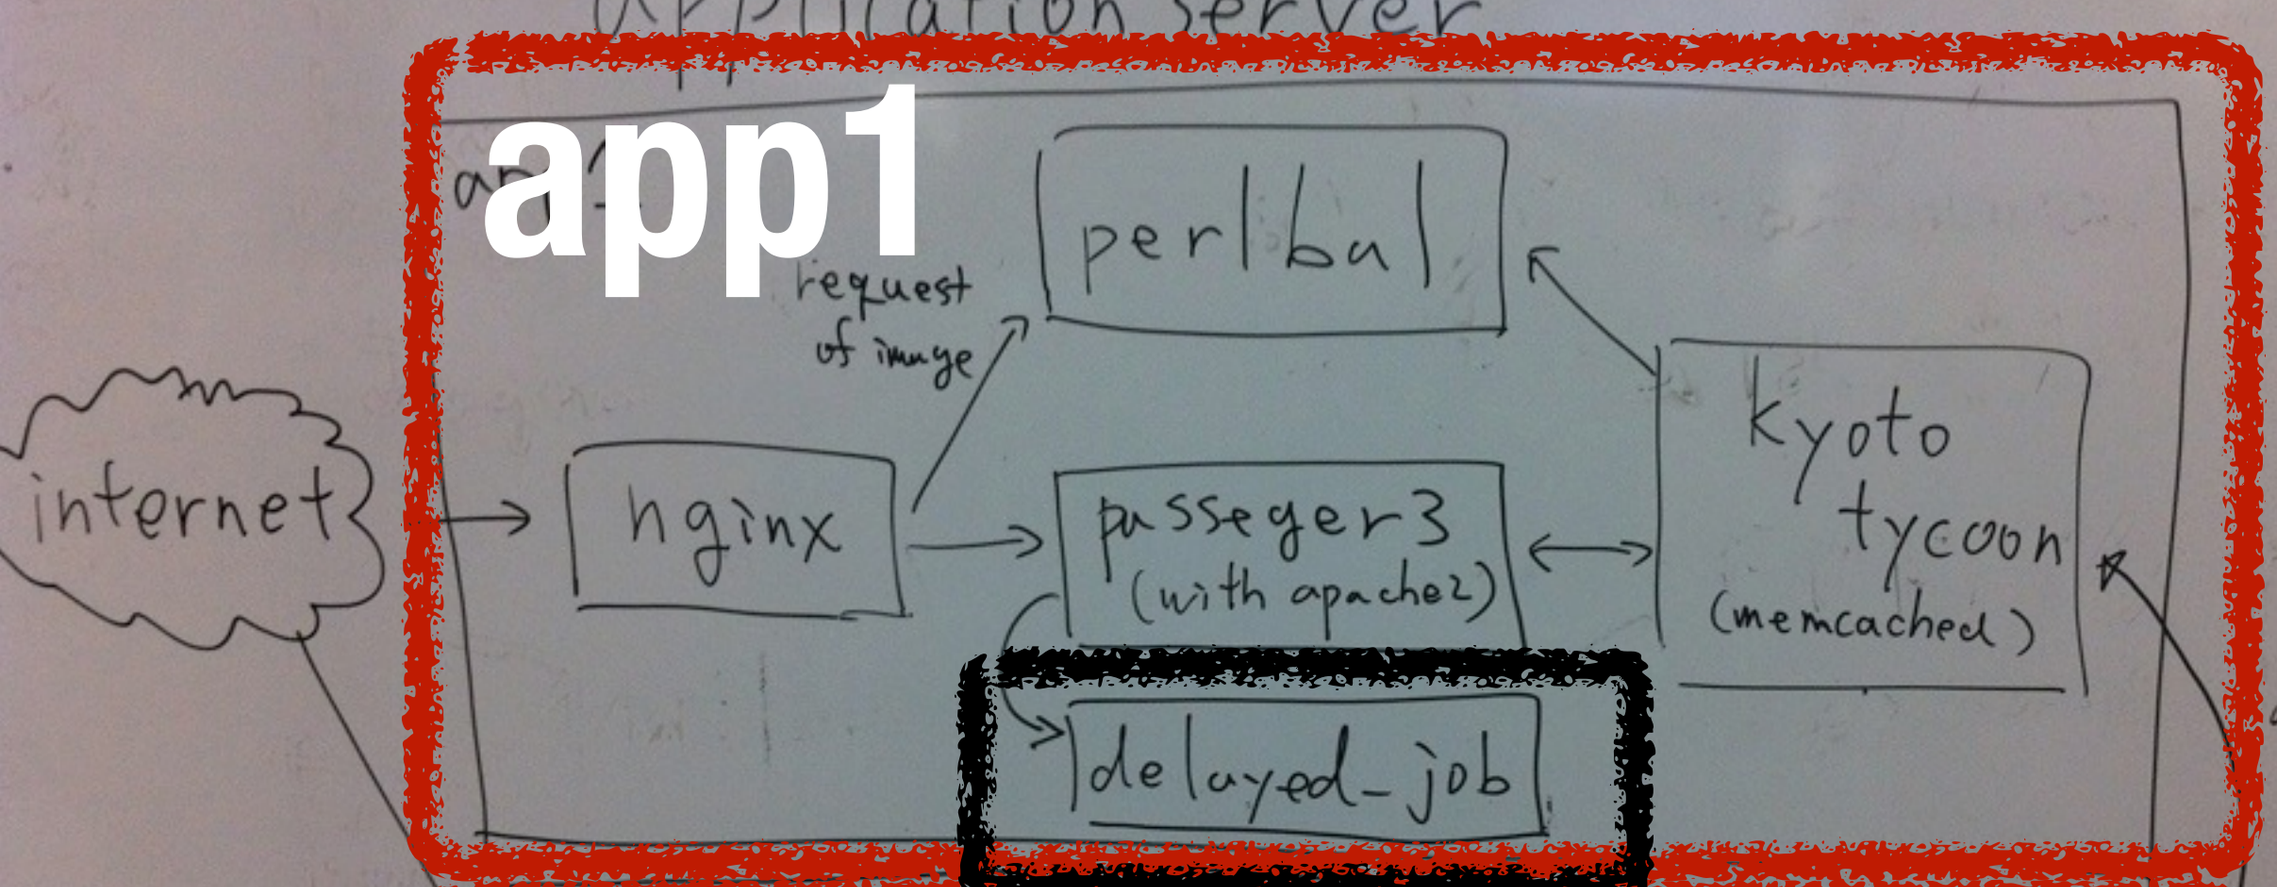

can’t use number

can’t convert application.rb...

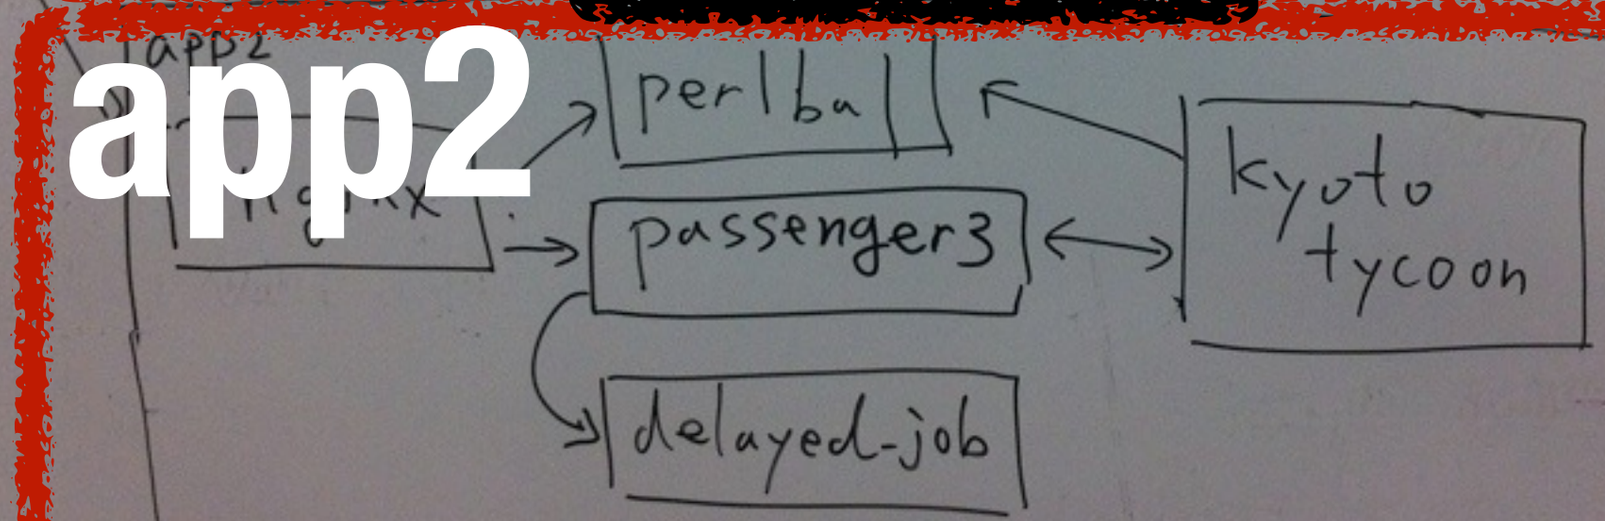

Reduce customer frustration.

app2

backgroundrb to dj

[WIP] Upgrade to Rails 3.2 #1565

Edit | New Issue

Merged **hsbt** merged 468 commits into `master` from `rails32` 5 months ago

Conversation 0 | Commits 250+ | Files changed 365 | +5,956 −7,318

hsbt commented 5 months ago

出し直し3回目

hsbt added some commits 8 months ago

- destroy_all を完全撤去、osaipo で行儀悪いテストがあったので 本体も若干修正 — 067fc27
- restructured — 737623d
- datetime 参照時のチェックを少し厳しくした — 987a79a
- moratrium の判定を解放したら落ちるようになってしまったのでテストケースを修正 — 2627162
- Marshal して戻すという workaround はもういらない — 997fe46
- ダミーデータを入れる — 091e259
- Merge branch 'master' into rails32 — 3b4efc9
- カバレッジパターンを独自に定義した — 5b9ba37
- Merge pull request #1219 from paperboy-30days/refinements-tests … — 9364e82
- update dependency — e94c7de
- Rails3 では post か get かは routes で厳密に判定するので verification は不要 — f49fc7a
- update dependency — 11d312c
- bad args — 00d2209
- fix broken tests — 9fe80d4
- 2.1 でも試験的に動かしたいので simplecov の範囲を限定 — 0060ba2
- Merge pull request #1220 from paperboy-30days/remove-verification … — 5aef3f7
- shoulda 使わない — 8e0b1e6
- 単独実行時まで全て coverage 集計するのはやり過ぎ — 13d0e68

ruby -v:	ruby 2.1.0dev (2013-12-15 trunk 44217) [x86_64-darwin13.0]	**Backport:**	1.9.3: UNKNOWN, 2.0.0

説明

I found that r44213 broke bundler includes 1.3.5 and 1.5.0.rc.1 with ruby-trunk.
it is cause of SystemStackError.

Regression of Hash#reject in Ruby 2.1.1

In Ruby 2.1.0 or earlier, the `reject` method in any class that inherits `Hash` returns an object of its own class. But in Ruby 2.1.1, this behavior has changed accidentally to return always a plain Hash object, not of the inherited class.

```
class SubHash < Hash
end

p Hash.new.reject { }.class
#=> 2.1.0: Hash, 2.1.1: Hash
p SubHash.new.reject { }.class
#=> 2.1.0: SubHash, 2.1.1: Hash
```

(To be exact, extra states such as instance variables, etc. aren't copied either.)

Ruby 2.1.1 shouldn't include such behavior changes, because with the release of Ruby 2.1.0 we've changed our versioning policy, so Ruby 2.1.1 is a patch level release and it shouldn't break backwards compatibility.

This regression could potentially affect many libraries, one such case is Rails' `HashWithIndifferentAccess` and `OrderedHash`. They are broken: Rails' issue #14188.

This behavior will be reverted to the 2.1.0 behavior in Ruby 2.1.2, but is expected to be the default behavior for Ruby 2.2.0: Feature #9223. So we recommend to fix your code in order to expect this behavior change.

This accident is caused by one missing backport commit. For more details, see http://blog.sorah.jp/2014/03/10/hash-reject-regression-in-ruby211.

Sorry for any inconvenience, and thank you for your support.

Deprecations

Upgrading to Rails 4 covers each change and guides you through the tweaks you'll need to make for a smooth upgrade.

New Features

Upgrading to Rails 4 covers the features you'll want to be aware of when modernizing existing applications.

Common Upgrading Scenarios

Upgrading to Rails 4 covers specific scenarios you may encounter with upgrading and what to do when come across them.

Formats

Download on GitHub

If you found the book useful, please consider donating $15 or more to CFY.

Topics Covered

- Upgrade walkthrough and checklists
- Removal of Rails 2 style plugins
- Deprecation of Rails 2 finder syntax (e.g., `find(:all)`)
- Changes to routing: applications that use `match` may be affected
- Deprecation of certain dynamic finders (e.g., `find_all_by_...`)
- Deprecation of eager-evaluated scopes
- Changes to `ActiveRecord::Relation`: `#all`, `#includes`, and `#order`
- Turbolinks introduction and usage
- Thread-safe by default: how to upgrade and what to look out for
- Improvements to ActiveRecord associations
- Introduction of model and controller concerns: `app/models/concerns` and `app/controllers/concerns`
- Introduction of strong_parameters as an alternative to `attr_accessible` and `attr_protected`
- Support for the PATCH verb

New!!

A Guide for Upgrading Ruby on Rails

This guide provides steps to be followed when you upgrade your applications to a newer version of Ruby on Rails. These steps are also available in individual release guides.

1 General Advice

Before attempting to upgrade an existing application, you should be sure you have a good reason to upgrade. You need to balance out several factors: the need for new features, the increasing difficulty of finding support for old code, and your available time and skills, to name a few.

1.1 Test Coverage

The best way to be sure that your application still works after upgrading is to have good test coverage before you start the process. If you don't have automated tests that exercise the bulk of your application, you'll need to spend time manually exercising all the parts that have changed. In the case of a Rails upgrade, that will mean every single piece of functionality in the application. Do yourself a favor and make sure your test coverage is good *before* you start an upgrade.

1.2 Ruby Versions

Rails generally stays close to the latest released Ruby version when it's released:

- Rails 3 and above require Ruby 1.8.7 or higher. Support for all of the previous Ruby versions has been dropped officially. You should upgrade as early as possible.
- Rails 3.2.x is the last branch to support Ruby 1.8.7.
- Rails 4 prefers Ruby 2.0 and requires 1.9.3 or newer.

Ruby 1.8.7 p248 and p249 have marshaling bugs that crash Rails. Ruby Enterprise Edition has these fixed since the release of 1.8.7-2010.02. On the 1.9 front, Ruby 1.9.1 is
